Dear Hiring Manager,

I'm already fluent in Java, C++, HTML, and CSS. I'm currently learning JavaScript and Python. And I'm already fluent in Chinese and English. When I was 17 years old, I was in a Chinese professional soccer club U18 team played soccer for half a year. These experiences made me have lots of group work skills and discussion skills.

So I look forward I can a software engineer that brings my programming language skills and other group work skills to work in your software engineering company group.

A bit more about me: I'm a senior majoring in computer science at San Jose State University. I'm always prepared and fully participate in work activities. in the work or study, I manage to solve coding problems in different ways and willing to try various approaches.

When team discussion, I'm not hesitating to ask any questions he has. And I love to work with other teammates and help each other to understand the concepts to complete challenging programming projects. I'm highly motivated to dedicate my time to my work. I'm consistently performing well with a full load of classes/work toward my goal of becoming a software engineer.

As your intern, I'll bring my problem-solving abilities and group work experience to develop and improve testing technologies with your company team. My classes, work experience, and extracurricular activities make me an ideal candidate for this position.

- Coursework: After completing computer science main courses in Object-Oriented Design Java, Operating Systems, Computer Architecture, and Programming Language Paradigms. My major GPA is 3.624.

- Website project: I have built 2 websites project this year.

One is the Star Publicity Website. This website is a publicity site for a fan club, mainly including text introduction, video and picture display, and links to other publicity media.

Another one is my own personal resume website. This website is responsive web design. It shows my resume that includes skills, personal profile, work experience, and project details.

I truly would love to make a difference in the future of computer science life. My attached resume expands on my skill-set and accomplishments. Thank you for your time and consideration, and I look forward to hearing from you soon.

Sincerely,
Chen
